

Do you take medicine for a long-term condition?

If you do, check out this benefit. You may be able to get a 90-day supply of your medicine instead of a 30-day supply. This means you only need to refill your prescription four times a year.

Talk to your doctor about a 90-day supply.

The medicines covered by this benefit treat ongoing conditions like asthma, depression, high cholesterol, high blood pressure, and more. Covered medicines are listed on the next page. Look on your prescription bottle for either the brand or generic name.

If you take one of these medicines, ask your doctor if a 90-day prescription is right for you. If so, your doctor can write the prescription for 90 days. And you can pick up your medicine at your retail pharmacy.
