### Disclaimer

Highmark Health Options medical policy is intended to serve only as a general reference resource regarding coverage for the services described. This policy does not constitute medical advice and is not intended to govern or otherwise influence medical decisions.

### POLICY STATEMENT

Highmark Health Options may provide coverage under medical surgical benefits of the Company's Medicaid products for medically necessary removal of benign or premalignant skin lesions.

This policy is designed to address medical necessity guidelines that are appropriate for the majority of individuals with a particular disease, illness, or condition. Each person's unique clinical circumstances warrant individual consideration, based upon review of applicable medical records.

The qualifications of the policy will meet the standards of the National Committee for Quality Assurance (NCQA) and the Delaware Department of Health and Social Services (DHSS) and all applicable state and federal regulations.

### DEFINITIONS

**Highmark Health Options (HHO)** – Managed care organization serving vulnerable populations that have complex needs and qualify for Medicaid. Highmark Health Options members include individuals and families with low income, expecting mothers, children, and people with disabilities. Members pay nothing to very little for their health coverage. Highmark Health Options currently services Delaware Medicaid: Delaware Healthy Children Program (DHCP) and Diamond State Health Plan Plus members.

### PROCEDURES

1. A prior authorization is not required.

Lesions that cause irritation, pain, or bleeding may require removal to alleviate symptoms. Surgical removal is also recommended for any lesion that shows possible signs of malignancy.

Removal of a benign skin lesion (e.g., nevus [mole], sebaceous cyst, wart, seborrheic keratosis, or pigmented lesion) may be considered medically necessary when ANY of the following criteria are met:

- There is drainage, bleeding, burning, intense itching, or pain associated with the lesion; or
- Inflammation, as evidenced by purulence, oozing, edema, erythema, etc.; or
- The lesion obstructs a body orifice, or restricts vision; or
- There is clinical suspicion of malignancy (e.g., a change in the ABCDEs of skin cancer [asymmetry, border irregularity, color, diameter, evolving or changing in size, shape, or color]); or
- Due to its anatomical location, the lesion is prone to being recurrently traumatized; or
- A prior biopsy suggests or is indicative of lesion malignancy.

Removal of a benign skin lesion (e.g., nevus [mole], sebaceous cyst, wart, seborrheic keratosis, or pigmented lesion) not meeting above criteria is considered not medically necessary.

Removal of skin tags that do not pose a threat to health or function are considered cosmetic, and therefore considered noncovered.

## 2. Post-payment audit statement

The medical record must include documentation that reflects the medical necessity criteria and is subject to audit by Highmark Health Options at any time pursuant to the terms of your provider agreement.

## 3. Place of service: outpatient

The removal of skin lesions is typically an outpatient procedure which is only eligible for coverage as an inpatient procedure in special circumstances, including, but not limited to, the presence of a comorbid condition that would require monitoring in a more controlled environment such as the inpatient setting
