On-site asthma devices and supplies in a secure XpeDose™ unit from physician direct to patient

■ **SET UP AND EQUIPMENT IS FREE OF CHARGE**

Stellar Pharmacy Services installs and maintains your XpeDose™ system in your practice at no cost. Stellar monitors and replenishes medication inventory as needed.

■ **MEDICATION STORAGE IS SECURE**

Medications are safely stored and available for point-of-care use.

■ **ASTHMA THERAPY STARTS IMMEDIATELY**

Initiating point-of-care asthma therapy enables providers to teach patients and guardians proper use of inhalers, spacers and masks.

■ **XpeDose™ IS CONVENIENT FOR PATIENTS**

No need for the patient to take a prescription to the pharmacy. Patients leave the office with the appropriate medications, devices, inhalers, spacers and masks. Stellar notifies patients when refills are due.

■ **XpeDose™ SUPPORTS HEDIS MEDICATION ADHERENCE MEASURES**

A large-scale outcomes study demonstrated improved AMR scores, and lower overall health plan costs.

XpeDose™ Utilization Outcomes Study Results

Improving asthma medication adherence has positive overall health outcomes for patients, providers and health plans. Stellar Pharmacy Services, working in partnership with a major health plan, has documented outcomes showing higher asthma controller refill rates, lower ED visits, lower inpatient admissions, fewer inpatient days, and lower overall expenditures.*

 PHARMACY SERVICES INC.

XPEDOSE™

Inhalers, spacers, masks of various sizes, and medications are supplied at no expense to your office by Stellar Pharmacy Services

HOW IT WORKS

01

02

03

04

- During the office visit, the provider evaluates the patient and reviews the relevant history
- Appropriate treatment options are selected by provider and patient
- The provider follows prompts from Stellar's software to facilitate dispensing from the XpeDose™
- Once approved, the XpeDose™ unit unlocks, and allows the provider to remove desired product.
- Next, a prescription label (that meets all Federal and State Regulations) automatically prints completing the dispensing process.
- Point-of-care medication eliminates the need to take prescriptions to the pharmacy.
- After being counseled by an asthma educator, the patient leaves the office with inhaler, spacer, mask, and any other required medications.
